Office Action Summary

Art Unit: 1642

### **DETAILED ACTION**

1. Applicant's amendment filed 9/8/00 (Paper No: 2/A and 3/B) are acknowledged. Accordingly, claims 2-28 have been canceled without prejudice, and claims 19-51 have been added.

Claims 1, 19-51 are being examined.

### ***Election/Restriction***

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 1, drawn to a method of inhibiting tumor cell proliferation, classified in class 424, subclass 193.1.
  - II. Claims 19, 22-31, drawn to a population of proteins, classified in class 530, subclass 350.
  - III. Claims 20-21, 32-38, 50-51; drawn to a purified peptide (understood to mean one species made up by one molecular structure), classified in class 530, subclass 350.
  - IV. Claims 40-49, drawn to a method of making a composition, classified in class 436, subclass 177.

3. The inventions are distinct, each from the other because of the following reasons: Inventions I, IV and II-III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (M.E.P.. § 806.04, M.E.P.. § 808.01). In the instant case the different inventions of Groups II and III are drawn to different structurally and chemically independent and distinct compositions/products. Each of these groups can independently support different patentable inventions. Groups I and III are drawn to different methods with different method steps and assessment parameters and endpoint determinations.

Art Unit: 1642

4. The products of Groups II- III can be made by different methods as de novo chemical synthesis methods.
5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, their recognized divergent subject matter, and the search required for the different Groups are different, restriction for examination purposes as indicated is proper. Each of these criteria are independently applicable in that is Groups are classified as belonging to the same classification, they are separated because they belong to divergent subject matter, or require different searches, and vice versa.
6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
8. A dedicated Fax machine is in place to receive your responses. The Fax number is 703-308-4315. A Fax cover sheet is attached to this Office Action for your convenience. Please limit the use of this dedicated Fax number to responses to Written Restrictions.
9. Papers related to this application may be submitted to Group 1640 by facsimile transmission. Papers should be faxed to Group 1640 via the PTO Fax Center located in Crystal Mall 1. The faxing of such papers must conform with the notice published in the Official Gazette,
